

A close-up, perspective view of several layers of roof panels. The top layer is a dark brown with a wood-grain texture. Below it is a dark grey, ribbed panel. The bottom layer is a bright blue, ribbed panel. The panels are interlocked, showing their profile and how they fit together.

Beauty that  
outlasts

# Colour Availability

Product colour availability in your region depends on the location of the product’s manufacturing facility and the gauge (steel thickness) of the product. True Nature and Bellara products are available nationwide in all applicable colours.

\*Check with your local sales representative for product availability

## Using this Guide

Find your product in the left-side column to see which colours and gauges are available in your region. Colour and gauge combinations are available outside of the region for additional freight fees. Some conditions may apply to certain products/gauges. Contact your Vicwest sales representative for more details.

## About Gauge

Steel Gauge refers to thickness. A higher gauge means thinner steel. For comparison, 28-gauge steel, which is typical for residential applications, is equivalent to five regular sheets of paper thick. The following chart indicates how various gauges are commonly used.

GA	Application
16–22	Steel Deck
18–26	Commercial
24–28	Residential Roofing & Siding
26–30	Agriculture
